

# MFPN High Speed Facemill

## Free and Half-Price Facemill Promotion

With an innovative insert design and new MEGACOAT PVD coated grades, the Kyocera MFPN facemill has wasted no time shredding the competition!

The double-sided pentagonal design provides 10 cutting edges per insert resulting in cost effective machining. The combination of the tough, dual-angle edge design and the high 10° positive axial rake angle give the MFPN the ability to run at a higher feed rate, resulting in greatly improved productivity.

For a limited time, you can receive either a FREE MFPN or an additional 50% OFF an MFPN with the specified PNMU insert purchase. See below for details.

Offer valid through 3/31/11  
Kyocera reserves the right to alter or terminate this promo at any time
